## Technology Innovation and Field Services Division

### Using Biosolids and Coal Combustion Products for Soil Remediation at Mining Sites *Sponsored by: U.S. EPA Technology Innovation and Field Services Division*

July 24, 2014, 1:00 PM - 3:00 PM, EDT (17:00-19:00 GMT)

[Register](#)

#### Presentation Overview:

This webinar in the CLU-IN mining webinar series will focus on using biosolids, coal combustion products, and other soil amendments for soil remediation and revegetation at mining sites. The speaker will discuss and present case studies on the historical use of biosolids; use of biosolids and waste lime for soil remediation at smelting and other phytotoxic sites; and using coal combustion products, such as coal fly ash, and other soil amendments for site remediation.

#### Presenters:

##### Instructors:

- **Dr. W. Lee Daniels, Virginia Tech** ([wdaniels@vt.edu](mailto:wdaniels@vt.edu))

##### Moderator:

- **Michele Mahoney, U.S. EPA Technology Innovation and Field Services Division** ([mahoney.michele@epa.gov](mailto:mahoney.michele@epa.gov))
- **Jean Balent, U.S. EPA Technology Innovation and Field Services Division** ([balent.jean@epa.gov](mailto:balent.jean@epa.gov))
